

MindPal

The MindPal app is open source and can be run on any MacOS device using Xcode 10.3. Simply import this project (or clone it from: <https://github.com/AreJay-Smith/Mind-Pal.git>) into Xcode and click run.

The appflow.pdf shows the flow of the app.

The app will eventually be hosted on the Apple App Store, but it takes a few days for newly added apps to be published.
