

MindPal App Catalog

RJ Smith

rsmith432@gatech.edu

1 RUN THE APP

The MindPal app is open source and can be run on any MacOS device using Xcode 10.3. Simply import this project (or clone it from: <https://github.com/AreJay-Smith/Mind-Pal.git>) into Xcode and click run.

2 SOURCE CODE

All the source code for the app can be found in the MindPal folder. The app follows the basic MVC pattern, so the source code is divided up into those sections.

3 OTHER DOCS

The only other doc included is the appflow.pdf which visually shows the flow of the app.

4 APP STORE

The app will eventually be hosted on the Apple App Store, but it takes a few days for newly added apps to go through the review process and be published.
